

NIKITA 28 y.o.

About myself:::

I'm a designer with a passion for creativity and aesthetics. My calling is to create visual arts that inspire, and leave a mark in minds. My work is my hobby, my vocation, and my way of self-expression. I love exploring new ideas, forms, and colors to craft unique and unforgettable pieces of... whatever.

In my pocket:::

Web DE	SIG N	UI design	
HTML	Figma	CSS	AI
		A bit graphix design	Photoshop

Design Experience

Freelance 2020- 202x

You want an employee with experience, but you don't want to hire someone to gain experience.

Mivar-Textile 2021- 2023 Master technologist.

This is a product design. But in a slightly deeper sense. I have designed bean bags, cushions and outdoor furniture.

So, it was a textile design.

Design educated?

School

I studied at a school with a mathematical bias. And where there is mathematics, there is information technology. At school I learned HTML, CSS, design, working with Photoshop and 3D modeling.

Estonian Academy of Arts 2016-2018

After school I decided to connect my life with design and art. A year and a half after starting my studies, I was forced to leave the educational institution for personal reasons, and I also had the opportunity to earn money as a freelancer without finishing my studies.

wHy me

My design has its own style - a blend of minimalism and contemporary trends with a focus on pain in the eyes. I believe that every detail matters and can enhance visual perception. My style is inspired by geometry, and another websites. I strive to make my projects both functional and beautiful, always seeking new ways to improve them.

Thank you
